IT DOESN'T TAKE A  ROCKET SCIENTIST

**JUST A WEEKLY, 10 MINUTE TEST, USING
THESE TWO INSTRUMENTS WILL PUT
YOU IN CONTROL OF BOILER
MAINTENANCE AND ELIMINATE THE
TWO BIGGEST BOILER KILLERS**

SCALE AND ACID

No more guess work!

Knowing the TDS and Ph values of your boiler and condensate tank water is vital in maintaining your boilers health. These two simple tests, described in our illustrated easily understood manual tell you how, when, and how much boiler compound must be added to your steam system and how and when to blowdown your boiler.

EXAMPLES OF DAMAGE BY EXCESSIVE SCALE AND ACID
